Council Places Order for New Street Lighting System

Council Listens to Protests and Complaints

1941 Assessment Roll Adopted; Two Ratepayers Complain of Mud in Front of Residence.

The regular monthly meeting of the council was held on Monday evening. Present: Mayor Antrobus; Councillors Aboushy, Cox, Dutil, Ford and Ramsay. Walter Chukla, representing the Polish, Slav and Ukrainian concert committee, asked that council appoint a representative to attend the concert in the Polish hall next Sunday and be prepared to say a few words on behalf of the town. As Councillor Dutil will be present to represent the Red Cross, Councillor Ford will accompany him and speak on behalf of the town.

Two parties were present to get an explanation regarding a recent tax notice sent them by the secretary-treasurer. Following an explanation by the mayor, part payment will be paid on tax arrears and so eliminate the necessity of a caveat being placed on the properties.

Adam Wilson and George Evans were both present to ask council to take measures to eliminate the sea of mud which lies at their respective residences. The Works & Property committee was authorized to investigate. The drainage system at the Noyes-Radley residences on Third street will also be inspected with a view to improvement.

The tenant of the Lycka home was present to ask council to sell him the Lycka property. He stated he has consulted town solicitor Bannan and the latter had advised him that council would be in a position to sell the property this April. Council will be in session with that fact and secretary will write Mr. Bannan asking for full particulars.

Mickey Joyce, Ernie Houghton and Wm. Chapman were present and protested as ratepayers against Councillor Ford occupying a seat at the council table. They charged that he was not a property holder at the time of his election and therefore was not eligible to seek election to office. Much was said during the argument which finally wound up by the three ratepayers stating they would appeal against a decision given by town solicitor Bannan and take the matter to the district court. The council at a previous meeting, had gone on record to abide by the solicitor's decision which they have done.

Permission was granted the Empire Hotel to install a neon sign on the property.

A \$10 grant was authorized to the Canadian Institute for The Blind.

A letter from a department of the provincial government that a government assessor could not assess in an incorporated town.

The latest water analysis revealed that the local water supply is pure.

Electric wiring in the Berlin flats was recently inspected by town inspector Stewart Murdoch. He recommended some improvements be made and these will be relayed to Mr. Berlin by the council.

Mr. Knapsman, of Blairmore, was present and gave a detailed account of a salvage organization which he proposed to set up in the Pass. Mayor Antrobus was appointed to represent the council on the committee.

Last year's assessment was adopted. J. S. D'Apollonia will be appointed assessor for 1942.

COLEMAN NET STARS IN SERVICE

The name Roughhead included among the players performing with A20 Training Centre hockey team of Red Deer, against Navy recently seemed so familiar that upon inquiries we discovered that it was none other than Chick Roughhead, who, with Bill Balloch was among the finest tennis players ever developed in Coleman. Chick joined the army about two weeks ago and is playing a cornet in the Training Centre band at Red Deer. Balloch is in the navy, stationed on the Pacific coast—Harry Scott in Calgary Albertan.

PTE ROBERT LOWE at present located at Red Deer. He enlisted in September 1941. Born at Dunfermline, Fifeshire, Scotland, he has resided in Canada since he was nine years old. He is at present taking a course as a clerk in the R.C.A.S.C. His parents, Mr. and Mrs. James Lowe, wife and family reside here.

Easter Holidays Apr. 3 to Apr. 13 For Schools

Mrs. A. E. Knowles Given Renewal Contract at Ashes; Discuss Shopwork Supplies.

A regular meeting of the school board was held on Sunday morning. Present: Chairman Evans; Trustees Churla, Holly and Shoad.

Principal Hoyle and Instructor Frank Turner were present and discussed with the board the advisability of placing orders now for supplies needed in the shopwork class. It is becoming more and more difficult to obtain certain grades of hardwood as well as a number of other articles. Discussion took place as to the amount of hardwood that would be needed over a two or three years' period. It was finally decided that Mr. Turner would make out a list of the supplies needed plus the cost of each item. When the list is complete the board will give it further consideration.

A letter was read from Mrs. Clara Knowles asking for renewal of contract for removal of ashes. The contract was renewed.

A letter was received from Edmonton instructing the board that a certain man's property is now exempt from taxation as the owner is now in Canada's armed forces.

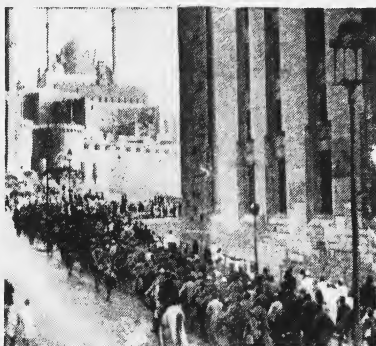

The Easter holidays will start on Thursday, April 2 and will continue till Monday, April 13.

Punch: A horticulturist says apples, in garden sheds and out-houses, are keeping much better this winter than they have done for many years. Yet our neighbor's small boys have been evacuated, too.

25,000 AXIS PRISONERS FROM LIBYA

By mid-December over 13,000 Axis prisoners captured by British and Imperial troops in the Libyan advance had reached Cairo on their way to prison camps for the rest of the war. The recapture of Bardia yielded 7,500 more, among them the German General Schmidt, the first German General to raise the white flag in this war. By January 7 the total was 25,000. Axis prisoners brought to Cairo from Libya bearing the massive walls of the 11th Century Citadel fortress. Beyond is the Mohamed Ali Mosque, and right, the Mosque of Sultan Hassan.

Joe Venier Remanded To Higher Court By Magistrate Gresham; Bail Set At \$8,000

Preliminary Evidence Heard at Wednesday's Trial; Magistrate Gresham Presided.

The preliminary trial of Joe Venier, of Bellevue, charged with manslaughter, was heard at the local court house on Wednesday morning, Magistrate J. W. Gresham presiding.

New witnesses were Mrs. Bruning, of Blairmore, who had been the duty nurse at the time the accident happened. She told of the external appearance of Rose Bubniak and Julia Mayerchak when brought to hospital.

Gordon Ross, employee at the Summit Inn, Crows Nest, told of seeing and speaking with Venier on the day in question. Venier had entered the beer parlour at 3.30 or 4 p.m. and had gone in and out of the beer parlour on a few occasions till 7 p.m. when he departed. He stated Venier was as sober when he left as he was when he entered the premises. Venier had 10 or 11 beers during the time he was in the Inn.

Joe Buratta, of West Coleman, described the truck's progress through a portion of West Coleman on the night of the fatality. He described it as zig-zagging from side to side.

Constable Stewart, R.C.M.P., gave evidence of having received the report of the accident, visiting

the scene, examining the broken fence, picking up pieces of glass found near the fence and having the glass examined at local garages where it was found to be part of the lense of a Fargo truck. He travelled to Venier's garage at Bellevue that night where he found a 1939 Fargo truck. One of the headlights was broken and pieces of glass were found inside the lamp. When matched with the glass found at the scene of the accident they were found to match in the same manner as a jigsaw puzzle. Glass from the lamp and from the scene of the accident were found to match so perfectly that the words "Connecticut" and "rightway" were formed from the different pieces. The truck was seized and later returned. He also found Venier's name and address painted in large letters on the left hand side of the cab and the name and address nailed to the right hand side of the truck on a placard. He saw accused and would describe him as intoxicated at about 10 or 11 p.m. that evening.

Sergeant Madiman had great difficulty in questioning Paul Sorlinette, who had stated at the inquest he had accompanied Venier on the ill-fated ride. After much time had been spent with Sorlinette it was decided to waive his evidence till a later date. Following the hearing of the evidence Venier appeared before Magistrate Gresham and was remanded to a higher court to be held at Macleod. Bail was set at \$8,000 which Venier had to raise by 3 p.m. that afternoon.

Moser's Orchestra to Provide Music at Lions Drama Festival

Peter Bakaj and Frank Hoxek To Play Solo Numbers; Four Clubs Enter Plays.

The Moser orchestra has been obtained by the Lions club to provide all music for the drama festival being held in Coleman on Friday, April 10. These talented artists have been heard on numerous occasions by music lovers of the Pass and the Lions club is most fortunate in securing their services.

They will play before the drama programs start and will entertain during the three ten minute intermissions. Two of the outstanding artists in the orchestra, Peter Bakaj, of Coleman, and Frank Hoxek, of Blairmore, will play a violin and clarinet solo.

Clubs taking part in the festival are Bellevue High School, Columbus Drama Club, Blairmore, Coleman Drama Club and Coleman Lions Club.

Advertising acts as a tonic to any head of business enterprise—large or small.

NEW OWNERSHIP OF WHITE LUNCH CAFE

Mr. O. W. Fielder, of Smokey Lake, Alberta, arrived in town on Monday to take over the business of the White Lunch Cafe. Accompanying him were the Misses Sophie and Nellie Ungaran, waitresses who have been in his employ for many years. Mr. Fielder has been associated with the restaurant business for some time. This week they are painting and renovating the premises and expect to open for business next week.

LEG AMPUTATED

DAVE KEMP was the victim of a tragic accident a West Canadian Collieries on Friday morning when his left leg was caught in a coal crusher and so badly mangled that it had to be amputated above the knee. He was engaged in his duties as foreman of the coal washing machine when the accident occurred.

Dave is known to hockey fans throughout western Canada for his great post-landing ability of past years. He is now resting comfortably and his friends expect to see him in the near future taking part in sports from the bench as a manager.

Division of St. John Ambulance Brigade Started Here

A McCulloch Divisional Superintendent; The 25 Persons Present at Meeting Become Members.

The meeting held in the council chambers last Sunday afternoon for the purpose of discussing the formation of a division of the St. John Ambulance Brigade resulted in a division being formed. The twenty-five persons present were unanimous in their decision to form a division in Coleman. It will be called the Coleman Miners' Division of the brigade.

Officers elected: Honorary members, A. F. Short, J. J. McIntyre, J. O. C. McDonald, R. M. Greenhalgh, L. McDonald, A. Brown, E. Morgan and H. Chamberlain, the latter two from Blairmore; divisional superintendent, A. McCulloch; ambulance officer, W. Lonsbury; sergeants, E. Hill and E. X. Hill; corporals, J. Simla, J. Maurer, J. Jasinsky, J. Goulding; secretary, J. M. Rushton; treasurer, J. Allan, Jr. A divisional surgeon will be appointed later.

Anyone desiring to become a member of this division need only approach any of the above officers and they will be only too pleased to make arrangements for him becoming a member.

Secretary J. M. Rushton is attending a meeting of the St. John Ambulance Association at Edmonton this week and plans on meeting Dr. G. R. Johnson, Commissioner of the St. John Ambulance Brigade, with the hope that he can get Dr. Johnson to address a meeting of the division at Coleman.

It is hoped to get a 'Ladies' Nursing division of the brigade started here as soon as possible. Both men and women before becoming members of these divisions must have their First Aid certificates.

In regard to the men they hope to have their uniforms in the near future. Practices will be held for two hours weekly.

Minute Test—The curve of a lens used in war optical instruments is tested by a "light interference fringe," the only method of measurement delicate enough for the process.

Material and Installation to Cost \$1,500

General Electric Company Given Order; 34 Units to be Installed, Ranging in Power From 300 to 500 Watt Lights.

At the council meeting on Monday night two General Electric salesmen were present at the invitation of the council to explain certain street lighting systems, the amount of material required and the cost of material and installation necessary for the main street system. These gentlemen brought with them a massive looking unit which had been placed on the market four years ago and which was in general use throughout the cities of Alberta as well as the larger towns such as Red Deer, High River, Ponoka and Pincher Creek. One gratifying feature about this unit was that it was dustproof. The outside of the glass was so designed that rain washed the dust from it. The salesmen guaranteed 80% light output from each lamp.

A survey of the present lighting system from the east end of town at the Coleman photo studio ring through to the bottom of Carbonad hill revealed that to give proper lighting 34 units would have to be installed.

Cost of the material and labor is estimated to total close to \$1,500. Six 500-watt lamps would be installed at the busiest corners and the 300-watt lamps on the street and highway.

Before council would commit themselves by placing the order a meeting was hurriedly called between an official of the Coleman Light & Water Co. and the council at 10.30 that evening to find out if a proposal offered by the company might be accepted. If the council would double its consumption the company would cut the rate to the council in half. The Light & Water company listened to the council's proposal and gave it more than one day to consider before its proposal of some years ago.

The street light system will consume almost three times that of the former system but the total consumption will be based on the amount of power consumed by all street lights in the town. This may mean that in order to double the consumption of the town's system a number of extra lights may have to be installed in the residential district.

The order was placed with the General Electric company last morning and the system is expected to be in effect within the next two months.

Present plans call for four lights being installed from the Photo studio to the Liquor Vendor's store, three lights from the town to Benck's, four from Coleman Hotel to Singer Sewing Machine store, four from Holyk's to the White Rose Service station, the other lights will continue on to the cardboard hill.

Due to the telephone poles and wires being on the south side of the street the lights will be installed on the north side.

J. M. RUSHTON ATTENDED ST. JOHN AMBULANCE MEETING AT EDMONTON

J. M. Rushton, secretary of the local branch of St. John Ambulance Association, left on Monday for Edmonton where he attended the annual meeting of the Alberta division of St. John Ambulance Association on Tuesday. While in the city he attended a banquet in honor of Lt. Col. Allison, Director of Ambulance.

The Realities Of War

In newspaper articles, and in talks over the radio, the statement has been frequently made that many people in Canada have not yet become fully war conscious, or that the full import of the seriousness of the war has not yet been realized. That because we are so far removed from the scene of the conflict, we have been unable to appreciate its full significance. There may be a very small minority who view this world tragedy with apparent apathy, but one ventures to believe that the vast majority of our citizens have a full realization of what Canada is fighting for, and what defeat for the Allied cause would mean. Since the entry of Japan into the conflict on the side of our enemies, the war if anything has been brought closer to our shores, and the initial successes of Japan have greatly increased our danger. For the first time since the beginning of the war the enemy has been operating submarines off the coasts of this continent, and survivors of sunken vessels have been landed on our east coast. Residents of Western Canada are fully aware of the dangers besetting our Pacific coast.

Facing The Situation

If anything further were needed to bring to the average citizen a more complete understanding of the serious conditions which we are facing, it is the ever increasing need for the conservation of the ordinary necessities of life. No one, in whatever station he may occupy, can fail to be affected in one way or another by this shortage. Being fully aware of this need for conservation, it can be assumed that we shall meet the situation with a minimum of complaint. Those of us, who for various legitimate reasons, are unable to bear arms in the defence of democracy, will have small reason to complain, when we consider the brave men of our armed forces. These men, many of whom have already made the supreme sacrifice, have not hesitated to leave the security of their homes and to go forth to meet the enemy.

The magnificent support that was accorded the second Victory Loan would indicate very clearly that the people of Canada have a keen appreciation of the necessity for furthering our war effort, and for providing the needed equipment for our armed forces. A significant feature of the loan was the number of small investors, indicating in a great many cases that many people of small means have made real sacrifices in their endeavor to furnish the sinews of war. Many stories appeared in the press during the progress of the campaign, some quite pathetic, of poor people who invested their meagre life savings in the cause of freedom.

For A Greater Effort

The time has long since passed when any thinking man can afford to adopt a smug attitude in respect to the progress of the war. It is not sufficient for us to pin our faith on the successful outcome of the struggle. It is true that we cannot conceive of any alternative other than that we defeat the enemy. But the war is not going to be won by any wishful thinking. It is going to mean that we cannot relegate our responsibilities to some mythical "other fellow," but that each one of us will be required to put forth every effort, either voluntarily or forcibly, if we are to win this fight. We find ourselves engaged with a ruthless enemy whose declared aim is to dominate the world. If we are to retain our freedom and our democratic way of life then no sacrifice will be too great for us to make. Canada has no reason to feel ashamed of the part she has already played in the prosecution of the war, but still greater effort will be needed to win the victory which will ensure to us the retention of our religious freedom, the right of free speech, and the preservation of the ideals which freedom-loving people have always cherished.

Proved Its Efficiency

Ontario Office Worker Invented A Machine For Sealing Envelopes

Charles A. Shupe, former member of the staff of the Rural Hydro Office, Simcoe, Ont., will long be remembered by employees of the present staff for his invention of an envelope sealing machine which has proved its efficiency.

Preliminary tests revealed the effectiveness of the machine although alterations were necessary. The staff was confronted with the task of sealing several thousand envelopes and decided to use the machine. Timing the sealing operation, 40 envelopes were properly sealed in one minute.

Tarakon Island, Borneo, now in Japanese hands, was one of the Netherlands Indies' chief petroleum sources.

Don't Let Your Liver Make You an Invalid

People who are of all colours say they're liverish or their liver is bad. Do you know how serious this is—that it may lead to permanent ill health—your whole system poisoned and broken down? Your liver is the largest organ in your body and most important to your health. It supplies energy to muscles, tissues and glands. If unhealthily, your body lacks this energy and becomes enfeebled—youthful vim disappears. Again your liver produces the bile to digest food, get rid of waste and allow proper nourishment to reach your blood. When your liver gets out of order proper digestion is no longer a stop—you're poisoned with the waste that decomposes in your intestines. Nervous troubles and rheumatic pains arise from this poison. You become constipated, stomach and kidneys can't work properly. The whole system is affected and you feel "rotten," head-achy, back-achy, dizzy, tired out—a ready prey for sickness and disease.

Thousands of people are never sick, and have won prompt relief from this misery with "Improved Fruita-tires Liver Tablets." The liver is toned up, the other organs function normally and lasting good health results.

Today "Improved Fruita-tires" are Canada's largest selling liver tablets. They must be good! Try them yourself! Now, let "Fruita-tires" put you back on the road to lasting health—feel like a new person. 25c, 50c.

Treat All Ailks

As long as private citizens have their mail scrutinized by the censors, we know no good reason why the same sort of scrutiny should not be given the mail of M.P.'s, no matter how much they complain about it, says the Brockville Recorder and Times.

Where Women Lead

Some 193 operations are required in the manufacture of the steel body of an army rifle. Sixty-three of these are on the barrel, and in one plant all but three are done by women.

Golf knickers are called "plus fours" because a tailor added four inches to the width when he was told that the standard length was not roomy enough.

Rainfall of one inch over one acre represents 100,993 tons of water.

"Constantly In Pain, Now A New Woman"

For a long time I felt miserable with liver trouble and constipation which brought on such bad headaches that I could hardly do my housework. I started Fruita-tires and felt better at once. After using only one box the awful headaches were gone, constipation left me, and I felt like a new woman.

Mrs. J. Duplantier, Cornwall, Ont.

"Suffered For Years, Now Feel Grand"

I was always irritable, tired, head-achy. I could not eat or sleep well and had very severe constipation. After trying many medicines I found "Fruita-tires". My headaches and constipation have disappeared and I am never tired or irritable now.

Mrs. J. H. Lallier, Montreal, P.Q.

R.C.A.F. Students

List Of Graduates From Schools In Western Canada

The following students, whose homes are in Western Canada, graduated from the following schools:

No. 4 Service Flying Training School, Saskatoon, Sask., February 27, (Pilots)—LAC B. J. MacLure, Wadena, Sask.; LAC D. J. McIntosh, Souris, Man.; LAC C. Tuma, Churchbridge, Sask.; LAC A. Wareham, Rivers, Man.; LAC J. A. Wilson, Birtle, Man.; LAC W. L. Yablonsky, Mikado, Sask.; LAC G. M. Young, Unity, Sask.

HOME SERVICE

SOFA REVIVED BY A NEW SLIP COVER

Made By Quick Pin-On Method. A glossy dark, brightly printed new slip cover does wonders for your old sofa's morale! It picks up the spirits of bedouins and sitters, too. You can make it easily the put on way. You just cut pieces of fabric directly to the sofa, snip off the excess material and sew piece to piece.

To start, remove cushions and pin fabric to top back with big pins. Pin down over the inside-back and seat of one section, allowing four inches for tuck-in between. Then turn around all the pins, leaving 1 1/2 inches for seams.

Now, working in the very same way, pin and trim other pieces of fabric to fit other back-and-seat sections and do likewise for front, arms, sides, back and cushions. Pin piece to piece, remove to bustle, then try on.

Finish with a deep, gathered bounce—or, what all the smart set are showing, a stuff one with corner kick-pleats.

Our 32-page booklet diagrams each step in making and in trimming slip covers for chairs, sofas, auto seats. Has directions for barrel and channel-back chairs; includes fully tailored cover styles. Suggests colors, fabrics.

Send 15c (in coins) for your copy of "How To Make Slip Covers" to Home Service Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg, Man.

The following booklets are also available at 15c each: "100—Vitamins To Keep You Fit," "130—World's Best-Loved Poems," "164—Party Games For All Occasions," "105—How to Make Rock Gardens and Lily Pools," "172—Effective Phrases For All Occasions."

The Ideal Way

The housewife's dream, to say nothing of the husband. Dishes washed without dishcloths and dried without tea towels. In British war factories, the kitchens which serve the factory "commons" wash the dishes with sprays of hot and cold water and dry them with a hot spray. After the hot spray, the dishes dry when they hit the cold air. Also, it is a cleaner drying.

According To Book

The young bride served up her first pie. "Is it nice, dear?" she asked hubby. "No ducks. It's terrible!" "That just shows how much you know about it! The cookery book says it's tasty and delicious!"

Was Too Smart

"Do you keep writing-pads?" "Ha, ha!" the fresh storekeeper said. "I don't keep them—I sell them!" "Well," retorted the inquirer, "you can keep the one I was going to buy."

Very little attention need be given the generator and starting motor bearings of an automobile if they are treated to a few drops of good oil at regular intervals. 2455

The Individual Citizen's Army

A Weekly Column About This And That In The Canadian Army.

By Alan Maurice Irwin

Once upon a time the cockiest looking soldier you would encounter was the Highlander, characterized by the swing of his kilt and his glistering white spats.

Today kilts are very seldom seen and the palm for cockiness has to be awarded to the Tank Corps man who wears his beret at a cocky angle and walks the streets with an air reminiscent of Kipling's cat to whom all places are alike.

And all places are alike to him. From the steel-walled turret of his tank he looks at everything he encounters with the unbiased, unembarrassed and unwarred look of a man who knows he can brush aside any barrier, surmount any obstacle.

In the interests of the readers of this column I made an investigation into what makes a "tanker" tick a few days ago.

Because I am not as young as I used to be and, therefore, a mile on the clumsy side I have a few assorted queries to report that the young, fit, well-trained tank man would not. Perhaps I'd better begin at the beginning.

The Commandant of the Training Centre said his eyes may have been twinkling I couldn't see because of the shine on his glasses—"we'll have a tank brought round for you to look at."

That was all right. But it didn't stop at that. When the tank arrived all 30 of us—it, a hospital sergeant, looked his head out of the driver's hatch and said: "Shall I take the gentlemen for a ride, sir?"

Bob Bowman of the C.E.C., was the reason for the plural. We looked at each other. We looked at the sergeant. There was no mistake about the twinkle in his eye.

We climbed in. By the time I had hoisted a middle-aged leg over the rim of the gun turret I seemed an awful distance from the ground.

A slightly hysterical major, who roared with laughter from a severe cough of the ride, advised me to stand on the gunner's stool with my head and shoulders in the open. "You'll see more from there," I felt more, and. And every time I looked inside during the quarter of an hour that we careered up hill and down dale there was the major, wedged in a corner of the gun turret, cackling horribly at my wild attempts to loosen the force of the buffers delivered by the plunging iron hippopotamus.

The tank man, to judge by my reactions, has a sense of power and invincibility as he advances steadily with a disregard for anything confronting him that no other soldier feels. Certainly I never felt it in France a quarter of a century ago.

Once you have safely clambered out of the tank after your first trip you realize that you have never had such a feeling of safety in any mode of travel before. It didn't seem quite the same when the driver put on speed, hurtled down a steep bank, rolled a few boulders aside, took a ditch in stride, climbed the side slope of a hill, turned in his tracks and charged down it again and headed straight for a tall and very thick-looking tree.

After the first time it was different. You don't dodge any more and you get that feeling that it doesn't matter what stands in your way. Then you have time to realize that your mobile fortress is giving you a degree of safety you didn't know existed. Instead of a copse of saplings such as we ploughed through you imagine a woods full of hostile machine-gunners and you know that their bullets will splatter harmlessly on the steel hull of your tank.

You know, too, that the crew of well-trained "tankers" under battle conditions will be spraying the ground ahead of them with shells and machine-gun bullets at a far faster rate than the best fire-power concentrated in any attacks in other wars.

It all adds up to a feeling of jauntiness by the time your first ride comes to an end you feel like tipping your hat to one side and "walking with an air."

But that jauntiness is an assured and sensible one, not a "devil-may-care" attitude. Tanks and the myriad other cross-country vehicles our boys are driving in the individual citizen's army of today are not turning them into reckless drivers when they get on to the road in civilian cars.

The effect is almost opposite. Once you get back into an automobile you think to yourself, "this thing isn't armoured and unhurt like that tank I was just in—I've got to handle this more carefully!"

"Yes, they're a cocky lot—these 'tankers'! And they have a right to be. They spend their fighting hours in hot, noisy quarters and feel like stretching when they get out."

They have an exhilarating job. They charge across country undaunted by obstacles. They carry the battle to, through and beyond the enemy.

HELP CANADA KEEP FIT

DUTY CALLS FOR FITNESS

Nabisco Shredded Wheat plays its part in the National Fitness program because it is 100% whole wheat, recognized by all food authorities as one of the "protective" foods. In Nabisco Shredded Wheat the wheat germ is retained in its entirety with all the bran and minerals in the unaltered wheat.

Serve two Nabisco Shredded Wheat, with milk, at breakfast—or any other meal! Make sure you get all the protective elements of whole wheat in this tasty, appetizing form.

THE CANADIAN SHREDDED WHEAT COMPANY, LTD. Niagara Falls, Canada

NABISCO SHREDDED WHEAT

Leaves It To Experts

Britain's Food Controller Has No Doubt To Do Cooking

Lord Woolton tells me that people are always asking him if he can cook. His answer is that he cannot.

He adds: "There was once a sausage shop at the back of the Bank of England. A man asked the owner to lend him £5. 'I'm sorry,' answered the sausage-maker. 'The Bank of England and I have an understanding. I agree not to lend money and the bank agrees not to make sausages!'"

"That," says Lord Woolton, "is my position. I leave the cooking to the experts—the British housewives."

The movable parts of the 100-inch reflector at Mount Wilson observatory weighs 100 tons. It is the largest telescope in use in the world today.

Beau Brummel, famed leader of London fashion of the 18th century, died a pauper in an insane asylum in 1840.

HITLER SAID TO HAVE PLANNED SCHEME OF WORLD CONQUEST WITH THE SUPPORT OF JAPAN

London.—A responsible foreign diplomatic source said he had information that Hitler has planned a grandiose scheme of world conquest to Japan involving a Japanese attack on Russia and a joint German-Japanese campaign in Africa.

The information was said to have come from diplomatic listening posts and agents in Europe and the Far East.

This source said he had "absolute verification" of reports that a Japanese military mission had been sent to Vichy-governed Madagascar off the African east coast.

Hitler's proposal to Tokyo, this source said, apparently involved these moves:

1. Japan would push on into India from Burma and at the same time attack South and East Africa to cut the British and American supply lines around the Cape.
2. Japan would attack Russia from Manchukuo "when the time is ripe" in an effort to help Hitler force the Soviet Union into a separate peace—by autumn if possible.
3. Hitler would "force" the Vichy government to help supply Rommel's Nazi force in North Africa and hand over two French battleships for raids to keep British and United States naval forces busy in the Atlantic.
4. Italy would be required to use her navy in a Nazi-directed Mediterranean sea campaign intended to break through to the Indian ocean to unite with Japan.

The informant said, however, that there is a division of opinion in Japan about heeding Hitler's suggestions, with one party led by the former war minister, Lt.-Gen. Seishiro Itagaki, contending that Japanese conquest should be limited to mopping up Burma and the Netherlands East Indies and occupation of the North Australian coast.

This party holds that Japan then would be in an advantageous position to negotiate for permanent possession of most of her gains.

Another party, led by Lt.-Gen. Tomoyake Yamashita, conqueror of Singapore and commander in the Philippines, is intrigued by the prospect of spoils of war in India and Hitler's promises to divide Africa with the Japanese, this source said.

Presence of Mind

Brantford, Ont.—An unidentified motorist was credited with saving the lives of three persons near Tilsonburg, Ont., when he used his own car to push an overturned automobile containing the three from the path of an oncoming Wabash train on tracks intersecting a highway near here.

BELIEVE NORTHERN OFFENSIVE WOULD BE OF ASSISTANCE IN LINKING FORCES WITH RUSSIA

New York.—Cumulative military and political evidence indicates the imminence of highly-important operations centring about the area between the desolate North Cape at the top of Norway and the cruel 1,000-foot granite cliffs of the Russian Murmansk coast.

Major air and naval operations already are under way, involving German capital ships, British torpedo planes undoubtedly operating from an aircraft carrier, other British warships and United Nations' convoys.

Free Europe, a review of international affairs published in London, said an Allied spring offensive in the west should have a good chance of success, for the forces now concentrated in the British Isles presumably are stronger than those the Germans have disposed from Kirkenes, Norway, to Hendaye, France.

This commentary declared both military and political reasons commended Norway as a spot where the Allies could strike with overwhelming forces. It added that control of Upper Scandinavia would give the United Nations a convenient link with Russia through Finland—and would put them in position to strike directly into the heart of Germany.

An offensive at the top of Europe might well be the extra contribution to Russia's cause which the Soviet Union gives every evidence of expecting. There is plenty to win: a successful push could wipe Finland from the war, open and protect the whole Allied-Russian supply line via

Synthetic Rubber Plant

Government Owned Corporation To Produce Rubber In Canada

Ottawa.—Munitions Minister Howe announced that a government-owned corporation known as Polymer Corporation Ltd. is being established to produce synthetic rubber in Canada.

President of the new company will be Col. Arthur L. Bishop, Toronto industrialist, and the company will have its headquarters in Toronto.

"Work is already under way on the preliminary plans and specifications of certain of the plants that will be needed," Mr. Howe said in a statement. "It is expected that production will begin before the end of 1943, and that when the plants are working to capacity their output will be about 34,000 long tons per year."

The minister said the synthetic production will not relieve the shortage insofar as the civilian is concerned.

"Every ounce of the synthetic rubber will be earmarked for war purposes," he said. "This means, of course, that the civilian will have to do without rubber of any kind for all but absolutely essential needs, and, in any event, will have to get along with reclaimed rubber wherever possible."

Unequal Contest

Japanese Had Great Superiority In Naval Strength At Java

London.—A Japanese fleet of 14 cruisers, 55 destroyers, 25 submarines and five aircraft carriers was in Netherlands Indies waters when the small Dutch and American fleets were forced into battle to defend Java, Premier Peter Gerbrandy of the Netherlands government, said here.

The American and Indies fleet was less than one third the size of the Japanese armada protecting some 60 transports which was attacked in the Sea of Java, he said, but despite the unequal contest the Japanese fleet suffered a severe blow.

The attack upon the line of transports, covered by submarines, failed, however, and an important part of the Allied fleet was lost.

"After vigorous defence for 12 days, the issue was decided. Against four-fold superiority on land and 10 fold in the air, the struggle became desperate," he said.

Gerbrandy said the defeat in the Indies for the Netherlands was "more serious because the occupation of the N.E.I. is much more destructive than it was in Europe."

Mounting War Costs

Britain's Expenditure Of £14,500,000 Daily Has To Be Increased

London.—Introducing a supplementary vote of credit for £250,000,000 (\$1,122,000,000) for war needs, Sir Kingsley Wood, chancellor of the exchequer, told the House of Commons that Britain's expenditures were 2½ times greater than two years ago.

He said expenditures for war needs are £14,500,000 daily and will show a further rise in the next few weeks. The total government expenditure was approximately £88,500,000 weekly from votes of credit, of which the fighting services took £38,000,000 weekly—nearly £19,750,000 each day, he said.

"We have left far behind the highest amount of expenditure in the last war and our requirements continue to increase," he said.

Building Torpedo Bombers

Powerful Planes Being Produced For British Fleet Air Arm

London.—A. V. Alexander, first lord of the admiralty, told the House of Commons that "a very much more powerful and faster" torpedo bombing plane now is coming into active production for the fleet air arm, which lost all of the torpedo-carrying Swordfish planes with which it sought to prevent the German battleships Scharnhorst and Gneisenau from running the Straits of Dover.

Ban On White Bread

London.—White bread is to disappear gradually from British tables and a national wheat meal or dark bread is to take its place, Food Minister Lord Woolton announced in the house of lords. Bakers will be allowed to continue making white bread until April 6. The action was taken to conserve shipping space.

ON WAR CABINET

Prime Minister Winston Churchill shook up his ministry and cut down his war cabinet to seven members. Of the new members the leading figure is Sir Stafford Cripps, shown here. The former ambassador to Moscow, now becomes lord privy seal and leader of the House of Commons.

Food For Singapore

Camberra Australia.—Premier John Curtin announced foodstuffs are being sent to Australia to Japanese-occupied Singapore in an effort to ensure proper feeding of Australian prisoners. "We were asked to send stuff," the Premier said. "It was put to us very straight that it had to be for everybody, including native population. It goes into a common pool, and the Japanese distribute it."

Finnish Losses Heavy

Berne.—Doctor Frietsch, a member of the Finnish parliament, was reported to have declared in Stockholm that the Finns have lost more men in the present campaign against Russia than in the 1939-40 war when 60,000 casualties were suffered.

FROM BRIGADIER TO TROOPER TO MAJOR

The Canadian Armored Corps was quick to realize the capabilities of G. P. L. Drake-Brookman, who enlisted as a trooper in the Canadian army. A British brigadier, he was court-martialed for striking two insolent German prisoners. Now he is a major at Camp Borden.

ALBERTA C.P.R. PLANT MAKES NAVAL GUNS

Sir Edward Beatty, G.B.E., (left) president of the Canadian Pacific Railway, is seen inspecting one of the 12-pound naval guns now being turned out by Ogden Shops at Calgary. The former railway shops are turning out complete assemblies, many of which have already been sent to seaboard for active service. With Sir Edward is J. L. Gubbins, works manager, and a mechanic who is putting the finishing touches to a gun barrel.

MAY DEVELOP HUGE UNITED NATIONS AIR TRAINING PLAN THROUGH LARGE SCALE MERGER

Ottawa.—Development of a United Nations air training plan through a large scale merger of United States air force training facilities with those of the Commonwealth Air Training Plan was considered virtually certain in qualified circles here.

The permanent joint defence board of the United States and Canada, by recommending the merger, has practically assured its acceptance, reliable sources said.

One highly authoritative source declared that the entire matter is one of working out plans and setting dates.

"It is only a question of time," he declared. Most of the negotiations to date for training British, American, Canadian and other air men within one gigantic plan have been conducted between the United States and Britain, it was understood.

Canada, according to responsible informants is waiting to see what proposals have resulted from the British-American discussions.

It was noted in this connection that Air Vice-Marshal L. Robert Leckie, head of the pilot training program for the Royal Canadian Air Force, was due to arrive here to report to Air Minister Power and other government and military officials on an empire strategy conference he attended in England.

Leckie disclosed on his arrival in

New York that the conference planned to bring the British Commonwealth Air Training program "up to date."

He added that observers from the United States navy and army air force had sat in at the proceedings.

Leighton McCarthy, Canada minister to the United States, also has predicted in Washington the Commonwealth Air Training Plan would soon become "one of the main training grounds for the United Nations," it was recalled.

Discussions of the merger proposals in some quarters, it was said, have dealt in dizzying terms with proposed costs and men involved but a quite matter-of-fact attitude towards the scheme was noticeable here.

It was understood that Canadian officials believe it can be accomplished only by a realistic approach, which will dispense with idle talk and settle down to concrete work of laying the foundations. It was stressed here, that whatever new plan is worked out it will not involve building new air schools in Canada.

Late in December the last of more than 90 air schools was opened and more than the present number of air men in training can be accommodated in the schools.

Launching of a United Nations air training plan would entail, it was suggested, extension of training facilities in the United States.

Doing Everything Possible

Argentina Making Effort To Investigate Conditions In Hong Kong

Buenos Aires.—Foreign Minister Enrique Ruiz Guinazu conferred with the Argentine ambassador concerning Argentine efforts to investigate British complaints of ill treatment accorded war prisoners at Hong Kong, foreign office sources said.

Argentina, as the representative of Britain and Canada in the Far East, already has made representations to Tokyo and is seeking to have an Argentine observer designated as observer in Hong Kong.

Informed sources said Argentina had asked permission of Japan for a British ship to carry food and medical supplies to Hong Kong and Singapore.

In Samoa, a kiss is merely a sniff.

They Might Co-operate

Britain, United States And Russia Can Work Together After War

Toronto.—That Great Britain, United States, and Russia can continue working together in the vitally important post-war adjustment years is the belief of a big majority of those in England, according to latest returns from a British Gallup poll asked to the affiliated Canadian Institute of Public Opinion.

The British Institute asked the question: "Do you think it possible that England, United States, and Russia will continue working together after the war?"

Sixty per cent. of those interviewed in a scientifically selected cross-section of the British public replied yes, 17 per cent. no, and 23 per cent. were undecided.

PORT OF PRINCE RUPERT MAY BECOME AN IMPORTANT BASE FOR THE DEFENCE OF ALASKA

Ottawa.—Qualified Ottawa sources indicate that the port of Prince Rupert on the west coast will become an important supply base for the defence of Alaska against the serious possibility of Jap attacks.

Public attention has been focussed for the past few days on the deci-

sion to begin construction of the Alaska highway as a defence measure. However, experts in Ottawa and Washington have regarded Prince Rupert as the outlet through which will pour men, foodstuffs, and munitions to Alaska.

The use of Prince Rupert as a main supply base would involve ocean transport. But troop and munitions ships would be subject to danger of submarine attack for less than half the trip to Alaska. Sources in Ottawa say the submarines could operate in only about 400 miles of the water involved.

The Ottawa sources say soldiers and equipment transported by the route will be disembarked at an unspecified Alaskan port. From this point they will be transported to Fairbanks, Alaska, by rail.

Troop transports could slip out of the large and well-equipped harbor of Prince Rupert and ease along the British Columbia coast behind a protecting screen of islands. These islands are situated in waters where it would be impossible for submarines to operate.

Ottawa sources offer three reasons for the importance of Prince Rupert as a base. They are:

1. The Alaska road, even if completed this year will be only a "pioneer" highway, capable of carrying only about 10 to 15 per cent. of the volume of a normal highway. Sufficient supplies to equip Alaskan defences could not be moved across it—or so these quarters say.

2. Alternative ports—Seattle and Vancouver—are 750 miles farther by sea from Alaska and most of the additional distance is exposed to submarines.

3. Prince Rupert already possesses adequate port facilities for the traffic and has good rail connections.

Detroit News: For awhile, after the rubberless age sets in, it may seem strange sitting down to a plastic of bridge.

NOTES AND COMMENTS

All Must Work for Victory

Though the nature of the miners' work makes Saturday a welcome relief from underground toil, yet the demands of war necessitate a six-day week as against five to fill the demand. So long as the rights of labor are not infringed no reasonable man will draw the line for it must be considered as part of the war effort.

The response to the Victory Loan appeal shows that given the right lead, the majority of the people of the Crows Nest mining area will back up the all-out effort to win the war. A large section of our population came from countries now under the iron heel of Nazi Germany, and they realize that there are privileges under our form of government which are today non-existent in most of Europe.

St. John Ambulance Association's Fine Work

For many years Coleman has had St. John Ambulance and First Aid teams which have distinguished themselves in competition with teams throughout Canada. The time put in by the members to make themselves proficient in this work is given voluntarily, so that in time of emergency or disaster they may be of service to their fellow men. The nature of the miner's work is hazardous, and frequently accidents occur far below ground where it is difficult to promptly secure medical aid. Then it is that the services of First Aid men are vitally important, for their prompt action might save lives. The mining companies have encouraged this work among their employees, yet the spirit of service has been uppermost in the hearts of those who volunteer for this work. It is not reward or credit that they seek; it is the urge to help others in times of stress and danger. It is a spirit to be admired and commended, and it gives a feeling of pride that throughout the years there have been sincere leaders who have kept up the work and thereby encouraged younger men to fill the ranks as older men pass on. So quietly is their work carried on, including the giving of some of their time on Sundays to attend instruction classes, that it is taken for granted. They seek no publicity, which makes their services the more commendable. Deep down in the bowels of the earth many a quiet act of heroism has been performed and of which little has been said. It has often been said that "Peace hath its heroes, no less than war," and many instances could be recorded in the mining industry of men who have voluntarily faced death or injury to rescue comrades.

Criminal Carelessness on Highways

The death last week of a young schoolgirl aroused public indignation. The callousness of a driver proceeding onward after he had run over the victim, without stopping to find what assistance he might have rendered, calls for the severest condemnation. It was a criminal act, and none the less excusable if the driver was under the influence of liquor. Added to whatever sentence might be meted out to fit the crime, drivers such as this should never be permitted to again be at the wheel of a vehicle on the highway. There are far too many incapable drivers, and many who though they may never take intoxicating liquor, are yet risks to the safety of others. Examinations for drivers licenses should be more severe. Driving a car at 40 miles or more requires steady nerves and the ability to think and act quickly. The wonder is that there are not many more fatalities considering the ease with which licenses can be secured.

Musical Festival Next Month

The Crows Nest Pass Musical Festival is an institution which since 1925, the first year it was held, has encouraged the study of music and singing among hundreds of young people in these mining towns. People in other parts of the province express their astonishment that there is such a high degree of culture in the art of music, particularly in an area that on the surface would not appear to be fertile ground for the study of the finer arts. Credit in large degrees goes to the teachers of music who have carried on in the face of financial difficulties, and who have coached pupils to a high degree of proficiency. Not only in individual performance have there been outstanding pupils, such as Frank Hosek, coached by Mr. W. H. Moser, but in the junior orchestras as well. Towns far better equipped in the matter of talent and financial support have entered in competition against these young people, yet invariably the top awards have gone to the competitors of this area. This festival is deserving of the support of all business people. It makes no great demand on anyone's purse, yet its value in the finer things of life is beyond price, for music enlightens the soul and enriches the nation.

Sport Keeps Up Morale

War or no war, sports such as baseball and football are necessary for the young people. Isn't it time to start the ball rolling towards organizing for the summer. The season is short, and now that Coleman has a well planned field in a very attractive location, good use of it should be made for the three or four months of summer weather. Let's get busy preparing right now. Remember the fun in past seasons when rivalry was keen and large crowds turned out when we had less facilities than at present. With daylight saving in force there will be added opportunity for summer sports, and what is better for mind and body?

Crows Nest Pass Board Of Trade Organized

Fourteen Young Business Men Attend Meeting; Four Guests Speakers Heard.

A meeting of business men of Pass towns was held at Blairmore on Tuesday, March 10, and resulted in the formation of the Crows Nest Pass Board of Trade. Four guest speakers were heard, they being Mr. J. W. Colwell, president of the Macleod Board of Trade, Mr. L. Cuthbert, manager of the Canadian Bank of Commerce, Macleod, Mr. L. L. Walker, R.C.A.F. and P.O. McDonald, R.C.A.F., both of Macleod.

Temporary officers were elected to get the Board fully organized, following which officers for the ensuing year would be voted to office. The temporary officers include: President, O. A. Botter; vice-presidents, Wm. Cole, J. Kubik, H. Sherratt; secretary, J. McPhail, Blairmore.

Coleman was represented by H. Sherratt, R. R. Pattinson, F. Abousady, N. Nicholas and E. Salvador.

Membership cards have now been printed and membership fee has been set at \$2.00 per member. It is hoped to get a large membership.

Theatre Notes

The gay musical comedy "Hula-balo" starring Frank Morgan and a number of young rising musical stars is guaranteed to make a big hit with lovers of popular music. The second half of the program features the Three Mesquiteres in "Lone Star Raiders."

A show that is getting a big play wherever it appears is "Men of Boys' Town." Two of the screen's foremost actors Spencer Tracy and Mickey Rooney are featured in the main roles.

The Lane sisters, May Robson and Claude Rains are superb in the film "Four Mothers" which comes to The Palace on Wednesday to Friday of next week.

At Cole's theatre at the weekend, the gay musical film "Night in Rio" is the main attraction.

2,000 MEN AND A GIRL

Songstress Frances Cramer, blonde and petite, is one of the chief reasons why twenty hundred young airmen file into the big concert hall at Exhibition Park every week to attend the CBC broadcast, "At Manning Depot." The program features the music of Russ Gerow's orchestra, the comedy sketches of Woodhouse and Hawkins and songs by Frances. The show will be heard again, on CBC's coast to coast network, on Friday, March 27, at 7:00 p.m. CDT (6:00 p.m. MDT).

An acknowledgment card was received by the Cigarette Committee from Boach Cousins, who is still stationed at Gibraltar.

Mrs. H. Davies entertained a number of ladies at bridge on Thursday evening. Prize winners were Mrs. Bert. Bond, and Mrs. Jack Jackson, Jr.

Mrs. James Kerr entertained at bridge on Thursday. Winners were Mrs. Beck, of Bellevue, Mrs. R. Vincent and Mrs. M. Fraser. Four tables were in play.

Bill Shields passed his medical examination last week during the visit of the recruiting officer. Five women also made application for enlistment in the R.C.A.F.

Soldiers home on leave at the week-end included L.C. J. Wilson, L/C J. Sudworth, Pte. J. Bodish, Pte. J. Powlyk and Corp. J. Mathers, the latter from Eculet, B.C.

Mr. and Mrs. Henry France and baby, accompanied by Mrs. R. Mitchell, motored to Calgary on Friday. Mr. France, Mrs. Mitchell and Pte. John Stevulak returned home on Sunday, Mrs. France, staying over in the city where the baby is now a patient in the Holy Cross hospital.

Mr. and Mrs. T. McGregor accompanied their son, John, B.C. A.F., to Lethbridge on Saturday. He was scheduled to leave Lethbridge for a new base at Edmonton.

Winner of the handsome picture of Crows Nest Mountain raffled by the Junior Red Cross, was W. Dionne. The picture was donated to the Red Cross by Gushul Studios.

Mrs. Matthew Wilson left at the week-end for Banff where she will visit with her husband for an indefinite period. Mr. Wilson is undergoing treatment for an injured back.

LAC Tom Goldring and Mrs. Goldring are the guests of the former's parents, Mr. and Mrs. T. Goldring, of Gratonown. LAC Goldring has been transferred from the coast to Claresholm.

Including an increase of \$96,000 over the previous figures, an appropriation of \$2,143,400 for new roads and maintenance was passed by the Legislature this week. The \$96,000 increase was earmarked for new main highway work. For district highways the total is \$225,000, including an increase of \$1,500. Maintenance on main and district highways was given a vote of \$775,000 for the first-named and \$300,000 for the second.

FOUR LOCAL MEN IN LATEST CONVOY

Four more local men landed safely in Britain on Tuesday of last week when a cable was received by the families of Sam Gillies, David Nevey, Mel. Cousins and Lawrence Caroe. A former Coleman man, Pete Brown, is also thought to have been in the same party.

WEDDINGS

SEMANCIK - DANYLUK

At 8:30 p.m., Monday, March 16, Hilda, the eldest daughter of the late Stephen Danyluk and Mrs. George Welsh, of Coleman, was united in marriage to Andrew Semanick, of Hillcrest, at the United church, manse. Mr. and Mrs. George Welsh were the official witnesses, and the bride's two younger sisters were in attendance. The happy young couple will reside at Coleman.

RHODES - BETTS

On Saturday, March 14, at 4 p.m. Mr. Daniel Rhodes, of Lundbreck, and Miss Edna Ann Betts, of Lundbreck, were united in marriage at the United church manse. Mr. D. Dickieson and Mrs. C. Kirk witnessed the ceremony. Mr. Rhodes is in business at Lundbreck.

RIDEOUT - McLEOD

A quiet wedding was solemnized at Central United church on Monday, March 9, when Viola Alwyn, youngest daughter of Mr. and Mrs. Fraser McLeod, became the bride of Sergeant Wireless Air Gunner Lorne Clarence Rideout, younger son of Mr. and Mrs. C. W. Rideout, of Chilliwack, British Columbia. Rev. E. Melville Aitken officiated.

The bride, given in marriage by her father, wore a turquoise blue frock, with accents in beige. Her corsage was of Talsman roses. Her only ornament was a cameo brooch, a gift of her brother, Petty Officer R. H. McLeod, of Halifax.

Miss Margaret McLeod, as her sister's only attendant, wore a navy blue frock with navy accessories, and a corsage of American Beauty roses. Mr. Howard F. McLeod, the bride's brother, was the best man.

Following the ceremony, a wedding breakfast was held at the home of the bride's parents, where Mrs. Norman Edwards and Miss Erno Krause assisted with the serving.

Mr. L. B. Fowler, uncle of the bridegroom, proposed the toast to the bride.

Sergeant and Mrs. Rideout left for Chilliwack for a short honeymoon, Mrs. Rideout wearing a plaid topcoat.

They will reside in Victoria where Sergeant Rideout is stationed.

The Churches

ST. ALBAN'S CHURCH
Rev. J. R. Hague, A.Th., Incumbent
11 a.m., matins and sermon. 2 p.m., Sunday school.

Help your country to victory—enlist now!

CASUALTY

The picture editor looked up as a shadow fell across his desk. Standing beside him was a hard-looking young man, evidently a factory worker.

"Are you the picture editor of this paper?" said the visitor.

"Yes. What can I do for you?"

"Did you put this picture in?"

continued the visitor, holding out for inspection a paper of the previous week.

The editor looked. The picture was a view of a Canadian aircraft factory, showing in the foreground some workmen busy on the fuselage of a plane.

"Yes," said the editor. "I remember that. What about it?"

The visitor's scowl deepened.

"See that man there?" he said, pointing to a dim figure in the background.

The editor looked more closely. The man could hardly be seen, but the picture showed that he was leaning against a pillar, watching the photographer.

"That man's me," said the visitor. "That picture cost me my job."—The Printed Word.

If every one of Canada's new army of wage-earners saves more, the country's effort toward winning the war will be greatly helped.

Every dollar you save means more labour and materials freed for making the war goods so urgently needed.

These savings, lent to the country in the purchase of War Savings Certificates or Victory Loan Bonds—lent to intensify Canada's war effort—will bring victory—and peace—nearer.

To Save is Practical Patriotism

WORLD HAPPENINGS
BRIEFLY TOLD

The United States war production board has ordered manufacture of radios and phonographs for civilian use discontinued after April 22.

Germany's approaching spring offensive has prompted Washington to speed all possible assistance to Russia.

Nearly 1,000 Italian troops were killed and an equal number wounded in the Italian-held sections of the Balkans during the last three months.

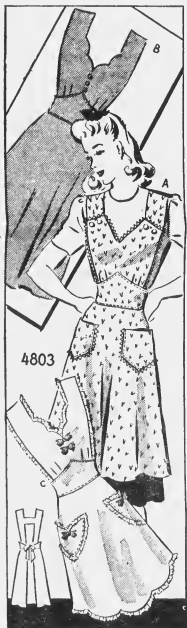

Great Britain has undertaken to supply war materials to Greek armed forces on a lend-lease basis in an agreement signed with the Greek government in London.

Rumanian despatches said that four girl students had been court-martialed in Bucharest and sentenced to forced labor for 10 to 20 years.

No steel will be released for the manufacture of baby carriages and lawn mowers, it was announced by F. B. Kilbourn, steel controller in the department of munitions and supply.

The Manitoba legislature was informed that there will be no recruiting of fishermen from Manitoba lake districts for work in British Columbia. It had been suggested that Manitoba fishermen replace Japanese in Pacific coast districts.

A radio "Oberammergau" in which the "voice" of Christ was heard made history in Britain. For centuries any direct portrayal of Christ has been banned on the British stage and screen.

MAKE A NEW APRON
WARDROBE
By Anne Adams

Like every busy, efficient housewife, you need a complete apron wardrobe! Why not treat yourself to one with Pattern 4803 by Anne Adams with which you can make an apron for every purpose. For everyday wear, Apron A is appropriate, with its "upped" waistband and ladder back that stays securely in place while you work. Make version B, with the scalloped neckline in a dark sturdy cotton for your heaviest tasks. . . . Make version C as a dainty tea apron your guests will adore. The scalloped bodice and hemline, the bow-trimmed pockets, look attractive with narrow lace.

Pattern 4803 is available in sizes small (32-34), medium (36-38), and large (40-42). Small size, view A takes 2½ yards 35 inch fabric and 1 yard tie-back; view B, 2½ yards 35 inch fabric; view C, 1½ yards 35 inch fabric and 8 yards lace edging.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly: Size, Name, Address and Style Number and send orders to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg, Man.

High heel shoes and "wedges" were worn in Europe in the 18th century.

SO YOU'RE GOING
TO DO A PLAY?

Requests from public school teachers in various parts of the province asking for a list of plays suitable for public school grades made me compile the following list which I do hope will help you solve your problems.

Public School Plays
Among the collection at hand I think you would enjoy for young children is Rose Fyfe's "The Nine New Plays for Children," which costs \$1.00. (Little Theatre series). It includes:

The Whisker—One scene, which takes place in front of a magician's cave. Four characters, a princess, a magician, a rabbit and a goblin.

The Moon—One scene, which takes place in a large moon with a door and two windows. Three characters, the man in the moon, his wife, and one of their children.

Cinderella—"At Home"—Two scenes, in Cinderella's house after she has been married to the prince.

The Sampler—One scene, cast 12 girls, 1 boy and a voice.

Three Naughty Imps—Two scenes, with a cast of three naughty imps, school mistress, squire, policeman and several school children.

Surprise—One scene, cast includes a pirate and four fairies.

The Test—One scene, cast includes a witch, her husband, their three daughters, a princess, a queer, a king and a wise woman.

Sleeping Beauty—Three scenes, cast, narrator, chorus, seven fairies, a bad fairy, prince, princess, dame, king, queen, courtiers.

Father Christmas—One scene, cast, Father Christmas, Mrs. White and Rose Red, the Gingerbread Boy, etc., and costs 20 cents.

Pattern Plays, costing 35 cents shows how to turn stories from narrative form into plays by various methods. A book every teacher interested in craftsmanship of plays should have.

Public And High School Plays
Eight modern plays, edited by John Hampden in a cloth bound volume, cost 45 cents. It includes:

The Princess and the Wood Cutter—One act, 5 boys, 2 girls and extras.

Robin Hood—One act, 14 boys and 3 girls, extras.

Suspense of Cinderella—One act, 8 girls and 1 boy, good festival play.

Michael—One act, 4 boys, 3 girls and 2 children, good festival play.

Eldorado—One act, 2 boys and 2 girls, good play.

Catherine Parr—Two boys, 1 girl, extras, scene is laid in breakfast room of Henry VIII's palace.

Plays from literature, 35 cents contains two 1 like: "Daisy's Ball" (from Little Men), and the "Friendly Waiter" (from David Copperfield).

The above volumes can be secured from Thomas Nelson and Sons, Ltd., 91 Wellington St. West, Toronto, Ont.

Non-royalty plays published by French:

Sauce For the Gossamer—Three men and four girls, comedy, good enjoyment for all. (Costs 30 cents).

St. George and the Dragon—A play in two scenes, five characters—king, chancellor, seign, the king's daughter, St. George and the Dragon. (Costs 30 cents).

Royalty plays from French:

Peaks—One act, 2 boys and 2 girls—a boy and his two sisters are keeping house while mother is away. Stranger makes things look bad. The lad gets into trouble and the stranger makes things look bad. Good interest throughout. Costs 40c.

Racketty-Packetty House—Three acts, and a prologue, royalty \$10.

First Dress Suit—Two boys, 2 girls—the son of the house gets a new dress suit for a wedding, but when the bridegroom's suit gets lost many interesting things happen. Royalty \$5.

There are other plays available which might suit your needs and I shall be glad to assist you if you write me enclosing a self-addressed, stamped envelope.

Nuf sed this time.—Mary Ellen Burgess, Box 326, Regina.

Spoils The Flavor

Tea Is Better Without Sugar According To Official Taster

C. J. Brown, official tea taster in the department of national revenue, who passes approval on the hundreds of tons of tea bought annually for the fighting services, gives this advice: "Don't put sugar in your tea if you want to enjoy its real flavor."

Besides making the tea taste better, 32,000 tons of sugar would be saved for other purposes if two out of three people who use sugar stop doing so, he added.

THIS CURIOUS WORLD

By William Ferguson

ANSWER: When Texas was a province of Mexico it bore a lone star on its coat of arms, and when it became one of the United States, the name "Lone Star" came right along with it as a nickname.

Farm Land Values

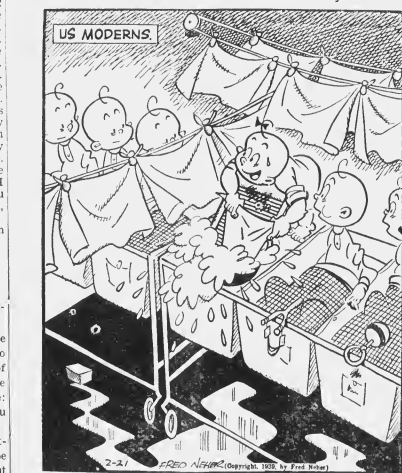

A Slight Increase Is Shown For Most Provinces

Higher farm land, values for Canada as a whole, and for most provinces, are indicated in the 1941 estimates, says an official report. The average value of occupied farm lands in Canada increased from \$24 to \$25 per acre. Increases occurred in the three Maritime Provinces, Quebec, Manitoba, and British Columbia. There was no change in Alberta but a decline of \$1 per acre was reported from both Ontario and Saskatchewan. The Dominion average, while higher than 1940, is still much below the values reported prior to 1929 when values ranged from \$37 to \$40 per acre.

There's a China in Maine and another town of that name in Texas.

LIFE'S LIKE THAT

"Being you're next to the door, we're making you chairman of the welcoming committee."

Finished Ahead Of Time

Minute Lost On One Commando Raid

The last "Commando" raid on Norway by the British Navy at the end of December, furnished a gem for those who believe in punctuality. The officer describing the raid said that it went "according to plan from beginning to end." Then he corrected himself. "Owing to a slight hitch," he said, "we arrived at the appointed place at 8:31 instead of at 8:30 on Saturday morning. The lost minute was made up handsomely; we left our job finished at 2:45 instead of at 3:00 p.m."

Just Propeller
The British air ministry has banned the word "aircrew," meaning propeller of an aircraft, from all official correspondence and conversation because it has frequently been confused with "aircrew." From now on "propeller" will be the accepted term.

In an 1815 eruption, the volcano Tambora, Netherlands East Indies, threw out about 38 cubic miles of solid material.

JESUS THE MESSIAH FORE-TELLS HIS DEATH

Golden text: For whosoever would save his life shall lose it; and whosoever shall lose his life for my sake and the gospel's shall save it. Mark 8:35.

Explanations and Comments

Jesus Is the Messiah, Mark 8:27-30. To escape the crowds and have an undisturbed opportunity to teach his disciples Jesus went northward with them into the neighborhood of Caesarea Philippi. On the way he turned to them and asked, "Who do men say that I am?" Before asking this question he had spent some time in prayer, according to Luke's account, which would indicate how vitally important he regarded this conversation with them.

John the Baptist, Elijah, one of the prophets, these were the men whom the people called Jesus, the disciples told him. The remarkable thing about what men thought of Jesus is that they found no one living great enough to whom they could compare him.

"But who say ye that I am?" Jesus next questioned. It was not the opinion of the crowd, but that of his little group of followers that mattered supremely to Jesus, for he had failed with them, he had utterly failed in his mission. He was depending upon them to carry on his work. But he had not failed, for Peter, as spokesman for the group, answered with conviction, "Thou art the Christ." "Christ" is a translation of a Greek word and "Messiah" is a translation of a Hebrew word, both of which mean "The Anointed." Hebrew kings were anointed with oil when attaining their kingship, and the Spiritual King was thought of as the Anointed, the Chosen One of God, until the Anointed, the Christ, became the name by which Jesus was designated.

The Messiah Must Be Put to Death, Mark 8:31-33. In the mind of Jesus the Messiahship involved the cross, and he began to atone to impart this thought to his disciples. The Son of man must suffer many things; "it was a necessity arising out of the very essence of things, something bound up in the warp and woof of the Kingdom of God." The message of the Kingdom but he knew that the Kingdom would never come by talking about it or describing it. The Kingdom must be lived. Jesus knew that dreams come true only when men will die for them, and that his dream for humanity meant the cross, the tomb, and the triumph of the Resurrection.

All this Jesus told the disciples plainly, in a way that it was impossible to misunderstand. He had spoken in vivid language before this (Mt. 9:13; 12:40; Jn. 2:18; 22:31, 6:51), but this was the first announcement in plain words of the inevitability of the cross.

SELECTED RECIPES

GOLDEN SPONGE CAKE

4 eggs, well beaten
2 cups white sugar
1 teaspoon almond flavoring

1½ cups pastry flour
¼ cup Benson's or Canada Corn Starch

1½ teaspoon salt
2 teaspoons baking powder
4 teaspoons butter
1 cup hot milk

Temperature: 300 to 325 degrees F. Time: 1 hour.

Method: Beat eggs until very light; gradually add sugar and flavoring, beating well after each addition. Carefully fold in sifted dry ingredients. Add butter to hot milk; heat to boiling; add to batter. Beat well with Dover beater. Pour into pan 8" x 12" lined with waxed paper and oiled with Mazola. Bake in slow oven till golden brown, for the first 30 minutes at 300 degrees F., then increasing to 325 degrees F. for remaining time.

COQUANT CRISPS

1 cup butter
1½ cups brown sugar
1 cup Crown Brand Corn Syrup

1 egg
1½ cups rolled oats
1 cup coconut

1½ cups pastry flour
1 teaspoon salt
2 teaspoons baking powder

1 teaspoon baking soda
Temperature: 300 degrees F. Time: 12 to 15 minutes.

Method: Cream butter; gradually add sugar and corn syrup. Add unbeaten egg and again blend. Add rolled oats and coconut. Sift dry ingredients; add to first mixture; chill the batter. Drop by spoonfuls about two inches apart on cookie sheet oiled with Mazola (the mixture spreads). Bake in slow oven until crisp. Remove from pan while hot. Yield about eight dozen.

The crust of the earth need move but one sixteen-hundredth of an inch to be felt.

HEALTH IN INDUSTRY

The maintenance of health in industry, particularly war industry, was the theme of a three-day post-graduate medical course, given at the University of Toronto, recently.

The course, which was open to medical graduates, particularly industrial physicians, was the first of its kind ever given here. It followed by nearly three months a special course for industrial nurses given by the School of Nursing.

Dr. J. G. Cunningham, director of the Division of Industrial Hygiene, Ontario Department of Health, said the course was of special concern because it studied the major causes of lost time in industry.

Among the main causes are respiratory, gastro-intestinal, heart and ailments affecting the blood vessels and skin diseases. According to Dr. Cunningham, the course for nurses was particularly successful. There are five full-time industrial physicians in Ontario and 65 who are associated directly with industries on a retainer-part-time basis. There are also many physicians who are on call by firms for service in accident treatment.

Lectures in the course dealt with health supervision in industry, with accidental wounds, injuries and burns and the control and management of sickness among industrial workers.

Not Classed As Official

Father Of Quilts Refused Extra Gain Under Rationing Plan

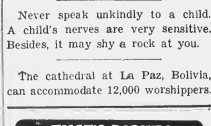

Olivia Dionne, father of the quilts, is going to get just the same amount of gasoline as any other drive-for-pleasure motorist when rationing becomes effective April 1.

Mr. Dionne applied for inclusion in category "C" under rationing regulations on the ground that, as quilts' guardian, he should be classed as a government official.

But, it was learned at Ottawa, that he is regarded as being in class "A"—entitled from 300 to 380 gallons of gasoline a year.

CHAPTER XIII.

"Can you tell me, please," a deep voice came from the big four-posted bed, "is this Heaven?" Christopher Sande made a movement as though to sit up, but reconsidering, sank back to the white pillow.

"Feeling better?" Tamar asked softly. "Sorry to disappoint you, sir, but you're still in Georgia."

Sande touched the handbag about his head, being careful not to disturb the position of his right shoulder. "There was a loud crashing noise, and that's all I remember."

"It's just as well. That was late yesterday afternoon."

Sande had slept fitfully during the night, moaning in his half-conscious state. Knox Randolph had spent most of the night sitting in the chair which she now occupied.

"I'm putting you to a lot of trouble. Am I going to live?" he grinned. "Now don't keep anything from me!"

Tamar smiled. "You'll be back at the Cricket Hill before this time next week, Dr. Forrester said. Lie still, now. Can you eat a little breakfast?"

"Well—no. I hardly think so. But never mind, I'll make up for it later." His eyes roved over the room. It was a pretty place, but a little feminine for the occupancy of a rough engineer, like himself, he thought with humor.

The next three days he was kept to his bed by Dr. Forrester. Tamar read to him.

His conversation touched upon many subjects and Tamar felt that she had known him for years. The fourth day Aristotele and Phoebe helped him downstairs to the little

breakfast room where Tamar found him when she came down. She saw the newspaper propped up in front of the host's chair and thinking it was her father, she said: "You're late this morning, aren't you?"

The paper moved. "Better late than never!"

Tamar laughed. "How did you ever get down these stairs by yourself?" "Phoebe and her offering helped me. Aristotele pulled and Phoebe pushed. We made it just before I collapsed." He grinned at her engagingly. "As a matter of fact, I feel disgustingly healthy this morning. I'm afraid I'll have to go back to work."

"It's too bad!" She touched the little silver bell at her place. Phoebe came in with a tray of frosted orange juice in tall glasses. Tamar sat across the small table from Christopher, her eyes studying his face. The swelling had receded from his brow, but his right arm was still in its sling.

Christopher saw the tiny blue-veined tracery about her temples, noticed with pleasure the softness of her white hands. Her black hair lay in small curls about her forehead, flaunting the efforts of her brush.

And she was in white again. For the first time in his life, Christopher Sande had been conscious of a girl's wearing apparel.

Tamar wore blue occasionally, but she was loveliest in white. A row of blue wooden buttons marched down the front of the dress, and her eyes beneath the black lashes reflected their blueess.

The small hands moved quickly with the covered samovar. She poured amber-colored coffee, served golden toast and perfectly poached eggs.

"Phoebe is a marvel," Sande sighed. "My stay here has completely disrupted my morale. I don't want to leave. Do I have to?"

Tamar's lashes swept down over eyes that must have leaped. "Do you have to go?" she repeated his question, this time for his answer.

"Why not stay on at Shadwell?" "I'd never get anything done at Cricket Hill! Much as I'd like to live here the rest—" he broke off quickly. "What's the news from the mine, Tamar?"

"Every thing is running smoothly. Of course, the major is anxious for you to get back, but I should say that the work is progressing."

After breakfast they strolled out to the terrace. Here a big green-striped umbrella shaded white chairs and a small round table. Tamar had handed him a cane in the hallway, and he leaned against her arm.

Tamar helped him into the chair and picked up a magazine. "This has all of the latest news condensed into quick reading. This is the first copy. It came while you were in bed. I'll run up and make Mother comfortable, and be back down in a minute."

As Tamar hurried up the stairs, the telephone rang. "I'll take it up here," she called down to Phoebe who stirred in the kitchen hall.

"Tam?" Ransome Todd's voice said. "May I come out tonight?"

"Tonight, Ranny?"

"Yes, tonight, Tamar," he repeated. "May I?"

"Of course. Come right on from your office. And we'll have dinner."

"I can't quite make it that early, but I'll be over for dinner."

Tamar walked slowly into her room. She sat down on the edge of her bed. Ranny would choose to tonight. And there were so few evenings left when she could have Christopher Sande all to herself. Even now, she had to divide his time with her father; and yes, even Phoebe and Aristotele who had become his willing slave.

Of course, Ranny knew that Christopher was here. She made a sharp movement and set up stifflly. That's why he hasn't called this week! And she reminded herself that she hadn't even missed him.

Days without Ransome Todd calling at Shadwell! The thing was incredible. Tamar recalled the last time she had seen him. He had acted downright hateful! She told herself, using one of Phoebe's favorite expressions.

She rose and went into her mother's room. "Mother, I've not meant to neglect you," she murmured to Maria Randolph.

"Phoebe indicated there were goings-on between you and that young engineer, Tamar. She thinks you're on the verge of a great romance. Is there anything to it?" Maria was not just sure that she wanted a romance between Christopher Sande and her lovely daughter. Love could be so cruelly misplaced if it were not properly guided into the right channels.

Tamar's voice said breathlessly: "Phoebe has her head in the clouds most of the time. I can't see how

she ever mixes a recipe, without having most of the ingredients missing."

"I'm going to fix a seat for you outside and Dad can carry you down for a sunbath this morning."

Maris wondered if Tamar had seen the gradual change in her or if by the very fact that she saw her almost hourly that there had been no visible change.

Quickly Maris sought to keep her mind from the subject. "Did Phoebe give you a good breakfast? And how is Mr. Sande this morning?"

"He's reading the new magazine out on the lawn, and he ate a hearty breakfast, as though he'd been riding to hounds—or—" he'd been ridden off. She remembered red jacketed men on splendid horses, the baying of hounds, the sound of a horn, hooves flying. What horses! The flashing colors of sleeky coated animals. Long-legged symmetry, deep chested, long-bodied speed kings, proudly lifting their noble heads to strain forward in powerful drive.

The hunt breakfasts! Tamar knew that her own memories were heavily spiced with old Cran's tales of the earlier days in the Big House.

Maris Randolph knew what chain of associations her daughter's broken sentence had brought. Tamar had rekindled the love of the old, in the Big House, and had often declared that she was the physical embodiment of that first Tamar Randolph.

"Go's you is, honey. De conjure man say dat in de thrid generation dey return to de live!"

"What kind of conjure man was that, Aunt Phoebe?" Ranny would ask skeptically.

"Nev' mind honey," Phoebe would say to Tamar. "Dem as is undisbelievin' ain' no chance t' know 'bout sech."

Well, Maris thought ruefully. Tamar was a convert to Phoebe's teachings. She certainly was not an "undisbeliever." It had worried her for a long time, but Knox had said to let her alone with her imagination. They couldn't hurt her if they were properly anchored with practical activities!

Tamar plumped up the pillows: "Shall I tune in the radio for your serial story?" Her fingers moved about the dial of the small radio.

"Ranny is coming to dinner," she said. Her eyes on the numbers. "I really wish he wouldn't tonight."

Maris caught the glimpse of two small furrows between the straight black brows. Signal of disturbance in Tamar's thoughts.

"Oh, it should be a very pleasant occasion. Why don't you call Seby darling, and ask her in, too. That would make a nice foursome."

"Mother! You really are a whiz! Tamar grasped at the suggestion.

"Whiz?"

"A word meaning marvel. A sage, a mastermind, an unraveller of chaos. A smoother-over, a Mr. Fix-it . . . a whiz, simply a whiz."

Tamar was laughing now, and leaning over, kissed her mother quickly, and squeezed her slender hands. "I'll call Seby. She'll be delighted."

And Seby was delighted. "You dear! Tam! Of course I'll come. Imagine my getting to spend the whole evening with Christopher!"

Tamar stared glumly at the telephone. That wasn't the idea at all she told its indifference.

(To Be Continued)

Outpost Hospital

Report Of Saskatchewan Red Cross Outpost Hospital Service For 1941

Since the opening of the War no attempt has been made to extend this service. There are nine Red Cross outposts operating in the province, and the duty has been to keep units already organized at as high a standard of efficiency as possible.

The outpost hospital work accomplished during 1941 covers the nursing care of 1,450 new adult cases and 391 infants in hospital, requiring a total of 16,379 hospital days.

Additional nursing care was given in 382 homes by nursing visits to district homes by the outpost staffs. These visits were in answer to calls, or to follow up service after discharge from active care in the outposts.

The large number of 1,827 persons were given care at the outposts for accidents and slight illnesses not requiring admission as in-patients.

The three classes of cases comprise a total of 4,050 persons of the nine outpost hospital communities who received nursing service at the hands of Red Cross nurses in Saskatchewan, during 1941, for which department of Red Cross activity was designed and has been continued through its twenty-second year.

The kingdom of Bhutan, which lies on the southern slope of the Himalaya mountains, in Asia, exports horses principally.

Women Prove Efficient

Have Been Trained For Productive Machine Work In T.C.A.

Showing the same industry and efficiency around the intricate mechanics of an airplane motor as they do around the kitchens of their own homes, women are becoming more and more in evidence at the Trans-Canada Air Lines maintenance and overhaul base in Winnipeg these days.

A report of the personnel reveals that one-seventh of the employees at T.C.A. are women.

To-day women, as well as men, are needed to keep planes flying. "Training women to do productive machine work in T.C.A. was a radical development, but it has proved worthwhile," declared James T. Bain, superintendent of T.C.A. maintenance and overhaul department.

Women are especially more efficient in repetitive work than men, the superintendent added. Plant authorities state that not only have the women workers brought efficiency and industry with them, but have raised the morale of the shop considerably.

If you were to make a tour of inspection in the plant you'd find Mrs. May MacMaster, an employee of 11 months, adjusting and calibrating a revolution indicator. Her work with delicate instruments is exacting. So keen is she about her work that she declares she'll never go back to office work.

An instrument tester is Miss Maxine Dixon, who is fascinated with the delicacy and precision of the instrument with which she works. A large proportion of the instruments are overhauled in this plant for the R.C.A.F. Miss Dixon works with extreme patience, aware that pilots depend upon her for keeping their instruments right for safe flying. If you think heavy and dirty work, faze girls you're wrong. Take the accessory shop for instance. It's dirty and the work is heavy, but to Miss Mary Goslak, who is an ignition harness expert, it's fascinating.

Axis Intrigues

Aimed At Stirring Up Revolt In India, It Is Said

Gen. Chiang Kai-Shek's recent visit to Khyber Pass and his address to warlike northwestern frontier tribesmen may help to offset Axis intrigues aimed at stirring up revolt at India's back door, well-placed observers said.

Private advices reaching London indicate that since the outbreak of war Axis agents have been working among frontier tribes, supplying them with light war equipment, including field wireless stations and machine guns.

More ominous, however, have been reports of activities by Japanese agents who were said to be urging revolt among disgruntled politicians in Kabul, with promises that Afghanistan would receive portions of British Baluchistan and an outlet to the Arabian Sea.

Good Advice

In the grammar lesson one day, the teacher wrote down on the blackboard:

"I didn't have no fun at the seaside."

Then she turned round to her pupils and said to one: "Roland, how should I correct that?"

"Get a boy friend," he told her.

Gardening

From practically any way you look at it, gardening should prove an excellent investment this year. It is patriotic to grow more vegetables now, to put the hand into use, and it is good, sound common sense, too. Vegetables have been getting more and more expensive in recent weeks and the authorities hold out no hope of bargains this summer either.

Weather was only partly to blame for the scarcity last fall. The main reason was the increased demand. In the last year Canada has added something like a million workers to its army of war employed, and still more workers are going to be added in the months ahead. All these people are going to need extra food and fresh vegetables will play a big part in filling their requirements.

And gardening offers another advantage. It is one of the best health tonics the doctor could order. A few hours out among growing flowers and vegetables will work wonders in restoring sanity and balance during these trying times of war.

No shorters.

The war has interfered with a lot of things in Canada, and while gardening is no exception, this interference will be hardly noticed by the average person who orders flowers and vegetable seeds this spring.

Before the war a considerable amount of the garden seed used in this country was imported from Denmark, Holland and Hungary. This is completely cut off, of course, as well as practically all shipments from Great Britain. To meet the usual demand, however, supplies have been developed in Canada and also a wider range has been imported from the United States. Seedmen report no serious shortages.

There is likely to be a little change in price but they suggest ordering early, especially where a wide range of varieties and types are wanted.

Biggest Crops

Vegetables are the biggest yielding crop one can grow. Not only can most lines be grown close together but with some things like lettuce and carrots, for instance, a second crop can be harvested in a single season.

Small vegetables like lettuce, spinach, carrots and radish require rows only from 15 to 18 inches apart. Beans and peas need from 18 to 20 inches between, while potatoes, corn and staked tomatoes must have a couple of feet to 30 inches. Space may be saved with these if something quick-maturing such as lettuce and spinach are planted in between.

The bigger things will not need the most space at first and by the time they do, the early crops will be out of the way. Where one is using a horse, garden tractor or a wheel hoe, of course greater space between the rows will be needed.

GEMS OF THOUGHT

TRUTH

Truth is the gravitation principle of the universe by which it is supported, and in which it inheres.—Everts.

Truth and love are two of the most powerful things in the world; and when they both go together they cannot easily be withstood.—Cudworth.

Error always addresses the passions and prejudices; truth scorns such mean intrigue, and only addresses the understanding and the conscience.—Azel Backus.

In the desolation of human understanding, divine Love hears and answers the human call for help; and the voice of Truth utters the divine verities of being which deliver mortals out of the depths of ignorance and vice.—Mary Baker Eddy.

Of all duties, the love of truth, with faith and constancy in it, ranks first and highest. To love God and to love truth are one and the same.—Silvio Pellico.

Religious truth, touch what points of it you will, has always to do with the being and government of God, and is, of course, illimitable in its reach.—Hitchcock.

A Proper Diet

Nutritionist Tells How To Live To Be 150 Years Old

You can live to be 150 years old, if you eat right, according to Dr. Flora Rose, retired dean of the Cornell University home economics department. The 150-year life span can all be enjoyed with vigorous health, too, she said, if the proper diet is followed.

"Nutrition is the key to a life in which one may enjoy the maturity of experience with youthful vigor," she declared.

Dr. Rose's dietary chart to longevity and good health includes consumption of a pint of milk daily, two vegetables, one green and the other yellow and raw, two fruits, one a citrus and plenty of whole grain bread. Vitamin concentrates were recommended for persons who lead sedentary lives.

Plenty Of Pepper

There seems to be plenty of pepper for two or three years' consumption, Canada is said to have sufficient for at least a year and United States buyers bought heavily from the Dutch East Indies prior to the war, sufficient, it is said to last them about three years. But on account of extra storage and other costs some spice prices have been advancing across the line.

Grin And Bear It

With many of the country's dentists in military service, toothaches are becoming widespread in Germany. The Koelnische Zeitung of Cologne reported "there simply are not enough dentists." The paper urged the people to be patient, to consult a dentist only "when the pain becomes too great or chewing is impaired seriously."

Machine-gunning a pilot who has bailed out of a crippled warplane is generally considered a highly reprehensible practice. So it occasions no surprise to learn that the Japanese are doing it.

C. N. P Salvage Committee Is Organized

Five Pass Towns to Take Part; S. Knapman Appointed Supervisor of Collections.

A meeting of representatives of Coleman, Blaimore, Frank, Bellevue and Hillcrest was held in Blaimore's town hall on Wednesday afternoon for the purpose of forming a committee and organizing for the Pass salvage drive. The chair was occupied by Mayor E. Williams, while Mr. Robt. Oakes acted as secretary.

On motion it was decided to name the committee "The Crows Nest Pass War Salvage Committee." The following were appointed to the executive with power to add to their number: Blaimore - E. Williams and R. Oakes; Hillcrest - P. McNeill and Geo. Cruick shank; Frank R. E. Donkin and W. Drake; Bellevue - J. Cousins and Principal McEachern; Coleman - Mayor Antroub and Frank Abousufy.

It is planned to first take up collection of metals, of which it is believed, several carloads will be available. Later, collection of paper, rags, rubber, etc. will be given consideration. Mr. S. Knapman, Blaimore, was appointed supervisor of collections for the whole district.

Anyone interested is asked to use the following phones: 209, The Journal, Coleman; 11, The Enterprise, Blaimore; 185, R. E. Donkin, Frank; 61j P. McNeill, Hillcrest; and 12M, Johnson & Cousins, Bellevue. Each of the five towns will be responsible for their own collection.

A. Ballch, W. J. Bartlett and O. A. Botter were appointed publicity committee. Mayors F. Antroub and E. Williams were appointed finance committee.

The campaign is being endorsed by the I.O.E. and Red Cross.

A further meeting will be held in the Blaimore town hall on Wednesday afternoon next at 1.30, when more definite plans will be submitted.

Legion Received Present of Championship Darts

Gift From Fred, Bill and Jesse Hirst and Tom Sudworth in Return for Cigarette Gifts.

Tom Rose, secretary of the Legion club, received an agreeable surprise this week when a small package was received from four local boys now in England, Fred, Bill and Jesse Hirst and Tom Sudworth. The package contained three Championship darts made of metal and was in appreciation of cigarettes sent them by the Legion's Cigarette Committee. The following letter was sent explaining the gift:

Dear Tom:

This is to show you at the Club that we appreciate the Cigs. These darts, as you will notice, are Championship darts, they are the heaviest we could get. I picked them because I liked heavy darts. They play a lot over here so keep in trim boys for the time we come back. We have received three lots of Cigs. and they are alright.

I am sending three bottles of beer to the Club, of course they are on a post card. I am putting a little paper in, you'll notice it's called the "Berlin Liar". Well I guess that's all so as the Tommy's say,
Cheerio Chums.

Slavonic Concert on Sunday to Aid Red Cross

To Be Held In Polish Hall; Music, Dances, Plays; Tombola Draw To Be Made

The combined Polish, Russo-Ukrainian and Czechoslovakian societies have combined to present a concert in the Polish hall on Sunday, March 22, at 7.30 p.m.

The program will consist of vocal and instrumental music, dances and short skits. The tombola draw will be held following the concert.

The concert's directors appeal to the public to donate at least 25c. Any person wishing to donate more may obtain an envelope at the door. Children will not be permitted unless accompanied by a parent.

Speakers, representing various local organizations, will be present and give short addresses. W. Dutil and Geo. Ford will represent the local Red Cross and council respectively.

Proceeds from the concert will go towards the Canadian, Russian, Czechoslovakian and Polish Red Cross societies.

Cigarette Fund Notes

Dear Sir: Ross and I just received another 300 cigs. and wish to thank you and all the members of the Canadian Legion. The cigs. are certainly appreciated over here. We have been quite fortunate lately and have been receiving them every month. We wish you all the best for the New Year and hope this year will see us all home again. Ross and Roy Foster.

Dear Sir: A few lines to say I received your gift parcel of cigs. and appreciate your kindness as they are arriving at the moment when I am out of them. Pte. McCulloch.

Many thanks for tobacco and papers. Always very welcome. Am now out of doctor's care and feel fine once again. Give my best regards to all. Joe Gate.

Sirs: Still kicking and enjoying your cigs. Life is pretty much the same around here. Weather is just about the same; was out in one of their pea soup fogs the other night, and that is the real name for it. Hope you are all well the same as I, and thanks ever so much. G. Burtinik.

Dear Archie: Received the tobacco two weeks ago and thanks a million. I am going on 7 days leave today and will no doubt see some of the Coleman boys. W. S. Vollendoff.

MAIL SHIP LOST THROUGH ENEMY ACTION

Ask Public to Make Sure That All Mail Is Properly Addressed.

Word has been received that a westbound steamer, expected to reach Canada with 906 bags of mail, has been lost due to enemy action.

This is something which is beyond the control of the Canadian postal authorities and persons expecting mail from overseas for the past week are asked to wait patiently on the chance that their mail might not have been on the ill-fated ship. Those who do not receive the expected mail must debit it to Hitler's marauders and not to the carelessness of the postal department, which is coping with and making a thorough good job of keeping the deliveries coming through smoothly.

The postal Department again urges the public to make sure letters and parcels are properly addressed and in the case of parcels that they are properly wrapped. The increased mail for overseas makes it imperative that postal employees' time be devoted to expediting a regular flow of mails rather than diverted to attend to letters which are improperly addressed or to re-pack and re-address parcels.

CONNOR ELECTRIC Washing Machines

A REAL BUY and NO TROUBLE

Red Cross Grand Slavonic Concert

to be held by the Polish, Russo-Ukrainian and Czechoslovakian Societies, in the

Polish Hall, Coleman
(Bush Town)

SUNDAY, MARCH 22nd

at 7.30 p.m.

Program consists of Vocal and Instrumental Music, Dances and Short Skits.

Tombola will be drawn for at the end of the Concert.

APPEAL

The organizers of this concert appeal to the public to donate at least 25c, which, after all, is not a large sum to ask for such a cause, as the proceeds of this concert will be donated to the Canadian, Russian, Czechoslovakian and Polish RED CROSS. Any person wishing to donate more, please ask for envelope at the door.

Children not admitted unless with parents.

All are Cordially Invited by the United Slavonic Committee

All sellers of tickets for Tombola please return the stubs before March 22nd.

Bellevue Dart Sharks Presented With Bathing Beauty Trophy

On Wednesday evening a number of dart sharks from Bellevue visited the local Legion club bent on trimming the local stars. The boys were willing and even brought forth a beautiful bathing beauty, rigged out in the most modern bathing costume, which was to be presented to the winners.

Bellevue's sharksters, a little embarrassed in the presence of such a beautiful young lady, failed to match the deadly marksmanship of the locals and were somewhat behind when the game was called for refreshments.

The Colemanites, always anxious to please, proved their good sportsmanship by presenting the bathing beauty to the highly delighted visitors. The beauty will now be competed for between all dart teams in the Pass.

It is cut from cardboard, colored, and is the work of George Derbyshire

Must Stick To Sugar Regulations

A warning to merchants who without question, fill requests for sugar in excess of the sugar-rationing regulations is given by Walter S. Campbell, Prices and Supply representative for Alberta under the War-time Prices and Trade Board.

"As a result of information given to us," says Mr. Campbell, "we have sent out certain persons to make sugar purchases for the Board, in excess of the amounts allowed for their families. In many cases it was found that merchants filled these orders without any question whatever, and without taking the name of the purchaser. Retailers, as well as consumers, are bound by the sugar-rationing regulations and must observe them."

The regulations allow three-quarters of a pound of sugar per person—50 per cent more than the allowance in Great Britain—and supplies may be bought for two weeks in advance. A family of four may buy 6 pounds of sugar each two weeks and a family of six, 9 pounds.

Where the housewife wishes to make marmalade, she can obtain the extra proportionate amount of sugar required when buying the oranges, or on production of the purchase slip.

A Reminder That The Meyers Studios Inc.

"Coast-to-Coast—largest Photographic Organization in the British Empire."

Will be photographing in their new "Colortone" process at the
